Plant Science, 73 (1991) 259—262
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 73 (1991)

Acer pseudoplatanus cells, H^+-ATPase, H^+-PPase, proton pump, tonoplast, vanadate, 23
Acetabularia mediterranea, immunoglobulins, self-assembling, cytoplasm, gene expression, 181
Agrobacterium, *Solanum tuberosum*, transformation, pathogenesis-related protein, tuber disc, potato, 167
Amylase development, axial control, feedback inhibition, *Macrotyloma uniflorum*, seed germination, starch-mobilizing enzymes, 155
Amyloplast division, in vitro, kinetin, potato tuberization, ultrastructure, 211
Arachidonic acid, *Solanum tuberosum*, plasmalemma, ATPase, hypersensitive reaction, *Phytophthora infestans*, elicitor, 137
ATPase, *Solanum tuberosum*, plasmalemma, hypersensitive reaction, *Phytophthora infestans*, elicitor, arachidonic acid, 137
Axial control, amylase development, feedback inhibition, *Macrotyloma uniflorum*, seed germination, starch-mobilizing enzymes, 155

Barnyardgrass, rice, *Oryza sativa*, sprangletop, *Leptochloa fascicularis*, *Echinochloa crus-galli*, fenoxaprop, haloxyfop, sethoxydim, 129
Brassica napus L., rapeseed, pollen, lipid, protein, quantitation, 117

Calcium and glycine effects, dark pretreatment, regeneration, electroporation, 103
Callus culture, genotypes, osmotic stress, salt stress, *Triticum aestivum*, wheat, 227
Cell culture, triazine, variant, selection, *Nicotiana tabacum*, photomixotrophic, somaclonal variation, induced mutations, 199
Cell cultures, sucrose metabolism, sugarcane, sucrose-phosphate synthase, sucrose synthase, invertase, 143
Cell differentiation, endosperm DNA, deletional gene rearrangement, wheat grain, *Triticum aestivum*, 175
^{13}C-NMR, *Parthenium argentatum*, guayule, rubber detection, in vitro culture, 97
Cotyledon, *Helianthus annuus*, plant regeneration, sunflower, 219
Cryopreservation, shoot meristems, *Trifolium repens* L., white clover, 111
Cybrids, *Daucus carota* L., petaloid CMS, mitochondrial genomes, 79
Cynodon dactylon, photoassimilate partitioning, phytochrome, diagravitropism, sucrose, 19
Cytoplasm, immunoglobulins, *Acetabularia mediterranea*, self-assembling, gene expression, 181
Cytoplasmic DNA, *Lycopersicon*, protoplast fusion, somatic gamma-hybrid, esterase, karyotype, morphology, 65

Dark pretreatment, calcium and glycine effects, regeneration, electroporation, 103
Daucus carota L., cybrids, petaloid CMS, mitochondrial genomes, 79
Deletional gene rearrangement, endosperm DNA, cell differentiation, wheat grain, *Triticum aestivum*, 175
Diagravitropism, Cynodon dactylon, photoassimilate partitioning, phytochrome, sucrose, 19
Diurnal variations, nitrate reductase, transcription, temperature, *Zea mays*, 149

Echinochloa crus-galli, rice, *Oryza sativa*, sprangletop, *Leptochloa fascicularis*, barnyardgrass, fenoxaprop, haloxafop, sethoxydim, 129
Electroporation, dark pretreatment, calcium and glycine effects, regeneration, 103
Elicitor, *Solanum tuberosum*, plasmalemma, ATPase, hypersensitive reaction, *Phytophthora infestans*, arachidonic acid, 137
Endosperm development, in vitro culture, storage proteins, zeins, *Zea mays* L., 1
Endosperm DNA, cell differentiation, deletional gene rearrangement, wheat grain, *Triticum aestivum*, 175
Esterase, *Lycopersicon*, protoplast fusion, somatic gamma-hybrid, cytoplasmic DNA, karyotype, morphology, 65
Euglena gracilis, fructose 2,6-bisphosphate, pyrophosphate:D-fructose 6-phosphate 1-phosphotransferase, 11

Feedback inhibition, amylase development, axial control, *Macrotyloma uniflorum*, seed germination, starch-mobilizing enzymes, 155
Fenoxaprop, rice, *Oryza sativa*, sprangletop, *Leptochloa fascicularis*, barnyardgrass, *Echinochloa crus-galli*, haloxyfop, sethoxydim, 129
Fructose 2,6-bisphosphate, *Euglena gracilis*, pyrophosphate:D-fructose 6-phosphate 1-phosphotransferase, 11
Fusicoccin receptor, plasma membrane, H^+-ATPase, radish seedlings, 45

Gametophyte, heat-shock proteins, *Sorghum bicolor*, sporophyte, 35
Gene expression, immunoglobulins, *Acetabularia mediterranea*, self-assembling, cytoplasm, 181
Genotypes, callus culture, osmotic stress, salt stress, *Triticum aestivum*, wheat, 227

β-Glucuronidase, transgenic potato, tuberization, patatin, 87
Guayule, *Parthenium argentatum*, rubber detection, in vitro culture, ^{13}C-NMR, 97

H^+-ATPase, *Acer pseudoplatanus* cells, H^+-PPase, proton pump, tonoplast, vanadate, 23
H^+-ATPase, fusicoccin receptor, plasma membrane, radish seedlings, 45
H^+-PPase, *Acer pseudoplatanus* cells, H^+-ATPase, proton pump, tonoplast, vanadate, 23
Haloxyfop, barnyardgrass, rice, *Oryza sativa*, sprangletop, *Leptochloa fascicularis*, *Echinochloa crus-galli*, fenoxaprop, sethoxydim, 129
Haustorial formation, *Striga asiatica*, witchweed, root culture, plant regeneration, root regeneration, 233
Heat-shock proteins, Sorghum bicolor, sporophyte, gametophyte, 35
Helianthus annuus, cotyledon, plant regeneration, sunflower, 219
Hypersensitive reaction, *Solanum tuberosum*, plasmalemma, ATPase, *Phytophthora infestans*, elicitor, arachidonic acid, 137

Immunoglobulins, *Acetabularia mediterranea*, self-assembling, cytoplasm, gene expression, 181
Induced mutations, cell culture, triazine, variant, selection, *Nicotiana tabacum*, photomixotrophic, somaclonal variation, 199
Invertase, sucrose metabolism, sugarcane, cell cultures, sucrose-phosphate synthase, sucrose synthase, 143
In vitro, amyloplast division, kinetin, potato tuberization, ultrastructure, 211
In vitro culture, endosperm development, storage proteins, zeins, *Zea mays* L., 1
In vitro culture, *Parthenium argentatum*, guayule, rubber detection, ^{13}C-NMR, 97

Karyotype, *Lycopersicon*, protoplast fusion, somatic gamma-hybrid, esterase, cytoplasmic DNA, morphology, 65
Kinetin, amyloplast division, in vitro, potato tuberization, ultrastructure, 211

Larger subunit, maternal inheritance, nuclear gene controlled plastid alterations, phosphoenolpyruvate carboxylase, ribulose-1,5-bisphosphate carboxylase, 55
Leaf tissue types, *Saintpaulia ionantha*, organogenesis, starch, stereology, 243
Leptochloa fascicularis, rice, *Oryza sativa*, sprangletop, barnyardgrass, *Echinochloa crus-galli*, fenoxaprop, holoxyfop, sethoxydim, 129
Lipid, *Brassica napus* L., rapeseed, pollen, protein, quantitation, 117
Lycopersicon, protoplast fusion, somatic gamma-hybrid, esterase, cytoplasmic DNA, karyotype, morphology, 65

Macrotyloma uniflorum, amylase development, axial control, feedback inhibition, seed germination, starch-mobilizing enzymes, 155
Maize transposable element Ac, transposon, transformation, protoplast, rice, 191
Maternal inheritance, nuclear gene controlled plastid alterations, phosphoenolpyruvate carboxylase, ribulose-1,5-bisphosphate carboxylase, larger subunit, 55
Mitochondrial genomes, *Daucus carota* L., cybrids, petaloid CMS, 79
Morphology, *Lycopersicon*, protoplast fusion, somatic gamma-hybrid, esterase, cytoplasmic DNA, karyotype, 65
Myzus persicae, ricinine, phloem-feeders, polyphagous, 253

Nicotiana tabacum, cell culture, triazine, variant, selection, photomixotrophic, somaclonal variation, induced mutations, 199
Nitrate reductase, transcription, diurnal variations, temperature, *Zea mays*, 149
Nuclear gene controlled plastid alterations, maternal inheritance, phosphoenolpyruvate carboxylase, ribulose-1,5-bisphosphate carboxylase, larger subunit, 55

Organogenesis, *Saintpaulia ionantha*, starch, stereology, leaf tissue types, 243
Oryza sativa, rice, sprangletop, *Leptochloa fascicularis*, barnyardgrass, *Echinochloa crus-galli*, fenoxaprop, haloxyfop, sethoxydim, 129
Osmotic stress, callus culture, genotypes, salt stress, *Triticum aestivum*, wheat, 227

Parthenium argentatum, guayule, rubber detection, in vitro culture, ^{13}C-NMR, 97
Patatin, transgenic potato, tuberization, β-glucuronidase, 87
Pathogenesis-related protein, *Solanum tuberosum*, *Agrobacterium*, transformation, tuber disc, potato, 167
Petaloid CMS, *Daucus carota* L., cybrids, mitochondrial genomes, 79
Phloem-feeders, *Myzus persicae*, ricinine, polyphagous, 253
Phosphoenolpyruvate carboxylase, maternal inheritance, nuclear gene controlled plastid alterations, ribulose-1,5-bisphosphate carboxylase, larger subunit, 55
Photoassimilate partitioning, Cynodon dactylon, phytochrome, diagravitropism, sucrose, 19
Photomixotrophic, cell culture, triazine, variant, selection, *Nicotiana tabacum*, somaclonal variation, induced mutations, 199
Phytochrome, Cynodon dactylon, photoassimilate partitioning, diagravitropism, sucrose, 19
Phytophthora infestans, *Solanum tuberosum*, plasmalemma, ATPase, hypersensitive reaction, elicitor, arachidonic acid, 137
Plant regeneration, cotyledon, *Helianthus annuus*, sunflower, 219
Plant regeneration, *Striga asiatica*, witchweed, root culture, haustorial formation, root regeneration, 233
Plasmalemma, *Solanum tuberosum*, ATPase, hypersensitive reaction, *Phytophthora infestans*, elicitor, arachidonic acid, 137
Plasma membrane, fusicoccin receptor, H^+-ATPase, radish seedlings, 45
Pollen, *Brassica napus* L., rapeseed, lipid, protein, quantitation, 117
Polyphagous, *Myzus persicae*, ricinine, phloem-feeders, 253

Potato, *Solanum tuberosum*, *Agrobacterium*, transformation, pathogenesis-related protein, tuber disc, 167
Potato tuberization, amyloplast division, in vitro, kinetin, ultrastructure, 211
Protein, *Brassica napus* L., rapeseed, pollen, lipid, quantitation, 117
Proton pump, *Acer pseudoplatanus* cells, H^+-ATPase, H^+-PPase, tonoplast, vanadate, 23
Protoplast, maize transposable element Ac, transposon, transformation, rice, 191
Protoplast fusion, *Lycopersicon*, somatic gamma-hybrid, esterase, cytoplasmic DNA, karyotype, morphology, 65
Pyrithiamin, soybean [*Glycine max* (L) Merr.], thiamin pyrophosphate, thiamin pyrophosphotransferase, 161
Pyrophosphate:D-fructose 6-phosphate 1-phosphotransferase, *Euglena gracilis*, fructose 2,6-bisphosphate, 11

Quantitation, *Brassica napus* L., rapeseed, pollen, lipid, protein, 117

Radish seedlings, fusicoccin receptor, plasma membrane, H^+-ATPase, 45
Rapeseed, *Brassica napus* L., pollen, lipid, protein, quantitation, 117
Regeneration, dark pretreatment, calcium and glycine effects, electroporation, 103
Ribulose-1,5-bisphosphate carboxylase, maternal inheritance, nuclear gene controlled plastid alterations, phosphoenolpyruvate carboxylase, larger subunit, 55
Rice, maize transposable element Ac, transposon, transformation, protoplast, 191
Rice, *Oryza sativa*, sprangletop, *Leptochloa fascicularis*, barnyardgrass, *Echinochloa crus-galli*, fenoxaprop, haloxyfop, sethoxydim, 129
Ricinine, *Myzus persicae*, phloem-feeders, polyphagous, 253
Root culture, *Striga asiatica*, witchweed, haustorial formation, plant regeneration, root regeneration, 233
Root regeneration, *Striga asiatica*, witchweed, root culture, haustorial formation, plant regeneration, 233
Rubber detection, *Parthenium argentatum*, guayule, in vitro culture, ^{13}C-NMR, 97

Saintpaulia ionantha, organogenesis, starch, stereology, leaf tissue types, 243
Salt stress, callus culture, genotypes, osmotic stress, *Triticum aestivum*, wheat, 227
Sethoxydim, fenoxaprop, rice, *Oryza sativa*, sprangletop, *Leptochloa fascicularis*, barnyardgrass, *Echinochloa crus-galli*, haloxyfop, 129
Seed germination, amylase development, axial control, feedback inhibition, *Macrotyloma uniflorum*, starch-mobilizing enzymes, 155
Selection, cell culture, triazine, variant, *Nicotiana tabacum*, photomixotrophic, somaclonal variation, induced mutations, 199
Self-assembling, immunoglobulins, *Acetabularia mediterranea*, cytoplasm, gene expression, 181
Shoot meristems, cryopreservation, *Trifolium repens* L., white clover, 111
Solanum tuberosum, *Agrobacterium*, transformation, pathogenesis-related protein, tuber disc, potato, 167
Solanum tuberosum, plasmalemma, ATPase, hypersensitive reaction, *Phytophthora infestans*, elicitor, arachidonic acid, 137
Somaclonal variation, cell culture, triazine, variant, selection, *Nicotiana tabacum*, photomixotrophic, induced mutations, 199
Somatic gamma-hybrid, *Lycopersicon*, protoplast fusion, esterase, cytoplasmic DNA, karyotype, morphology, 65
Sorghum bicolor, heat-shock proteins, sporophyte, gametophyte, 35
Soybean [*Glycine max* (L) Merr.], pyrithiamin, thiamin pyrophosphate, thiamin pyrophosphotransferase, 161
Sporophyte, heat-shock proteins, *Sorghum bicolor*, gametophyte, 35
Sprangletop, rice, *Oryza sativa*, *Leptochloa fascicularis*, barnyardgrass, *Echinochloa crus-galli*, fenoxaprop, haloxyfop, sethoxydim, 129
Starch, *Saintpaulia ionantha*, organogenesis, stereology, leaf tissue types, 243
Starch-mobilizing enzymes, amylase development, axial control, feedback inhibition, *Macrotyloma uniflorum*, seed germination, 155
Stereology, *Saintpaulia ionantha*, organogenesis, starch, leaf tissue types, 243
Storage proteins, endosperm development, in vitro culture, zeins, *Zea mays* L., 1
Striga asiatica, witchweed, root culture, haustorial formation, plant regeneration, root regeneration, 233
Sucrose, Cynodon dactylon, photoassimilate partitioning, phytochrome, diagravitropism, 19
Sucrose-phosphate synthase, sucrose metabolism, sugarcane, cell cultures, sucrose synthase, invertase, 143
Sucrose metabolism, sugarcane, cell cultures, sucrose-phosphate synthase, sucrose synthase, invertase, 143
Sucrose synthase, sucrose metabolism, sugarcane, cell cultures, sucrose-phosphate synthase, invertase, 143
Sugarcane, sucrose metabolism, cell cultures, sucrose-phosphate synthase, sucrose synthase, invertase, 143
Sunflower, cotyledon, *Helianthus annuus*, plant regeneration, 219

Temperature, nitrate reductase, transcription, diurnal variations, *Zea mays*, 149
Thiamin pyrophosphate, pyrithiamin, soybean [*Glycine max* (L) Merr.], thiamin pyrophosphotransferase, 161
Thiamin pyrophosphotransferase, pyrithiamin, soybean [*Glycine max* (L) Merr.], thiamin pyrophosphate, 161
Tonoplast, *Acer pseudoplatanus* cells, H^+-ATPase, H^+-PPase, proton pump, vanadate, 23
Transcription, nitrate reductase, diurnal variations, temperature, *Zea mays*, 149
Transformation, maize transposable element Ac, transposon, protoplast, rice, 191
Transformation, *Solanum tuberosum*, *Agrobacterium*, pathogenesis-related protein, tuber disc, potato, 167
Transgenic potato, tuberization, patatin, β-glucuronidase, 87

Transposon, maize transposable element Ac, transformation, protoplast, rice, 191
Triazine, cell culture, variant, selection, *Nicotiana tabacum*, photomixotrophic, somaclonal variation, induced mutations, 199
Trifolium repens L., cryopreservation, shoot meristems, white clover, 111
Triticum aestivum, callus culture, genotypes, osmotic stress, salt stress, wheat, 227
Triticum aestivum, endosperm DNA, cell differentiation, deletional gene rearrangement, wheat grain, 175
Tuberization, transgenic potato, patatin, β-glucuronidase, 87
Tuber disc, *Solanum tuberosum*, *Agrobacterium*, transformation, pathogenesis-related protein, potato, 167

Ultrastructure, amyloplast division, in vitro, kinetin, potato tuberization, 211

Vanadate, *Acer pseudoplatanus* cells, H^+-ATPase, H^+-PPase, proton pump, tonoplast, 23
Variant, cell culture, triazine, selection, *Nicotiana tabacum*, photomixotrophic, somaclonal variation, induced mutations, 199

Wheat, callus culture, genotypes, osmotic stress, salt stress, *Triticum aestivum*, 227
Wheat grain, endosperm DNA, cell differentiation, deletional gene rearrangement, *Triticum aestivum*, 175
White clover, cryopreservation, shoot meristems, *Trifolium repens* L., 111
Witchweed, *Striga asiatica*, root culture, haustorial formation, plant regeneration, root regeneration, 233

Zea mays, nitrate reductase, transcription, diurnal variations, temperature, 149
Zea mays L., endosperm development, in vitro culture, storage proteins, zeins, 1
Zeins, endosperm development, in vitro culture, storage proteins, *Zea mays* L., 1
